DETAILED ACTION

Response to Amendment

1. The present Office action is made in response to the Notice of Appeal and the amendment filed on 8/3/2009. It is noted that in the amendment of 8/3/09, applicant has amended claim 51 and canceled claims 55-60. The remaining claims 30-40 and 42-55 are examined in this Office action. Note that 1 and 3-29 were canceled in the amendment of 2/5/2008, claim 2 was canceled in the amendment of 8/4/2006, and claim 41 was canceled in the amendment of 10/9/2008.

Drawings

2. The objection to the drawings as set forth in the previous Office action is now withdrawn due to the cancellation of claim 57. As a result, the drawings contained seven sheets of figures 1-7 which includes six sheets of figures 1-6 filed on 3/26/2004 and one sheet of figure 7 filed on 1/18/2006 are approved by the examiner.

Specification

3. The objection to the specification as set forth in the previous Office action has been overcome by the cancellation of claim 57.

Claim Objections

4. The objection to claims 51 and 57 as set forth in the previous Office action have been overcome by the amendment to claim 51 and the cancellation of claim 57.

Allowable Subject Matter

5. Claims 30-40 and 42-55 are allowed.
6. The following is an examiner's statement of reasons for allowance:

The light transmitting photochromic lens as recited in the independent claim 30 and the method for creating such a lens as recited in the independent claim 51 are patentable with respect to the prior art, in particular, the U.S. Patent Nos. 4,805,989; 6,175,450 and 4,852,974 by the limitations related to the structure of the lens. It is noted that the use of an interference film coated on a substrate is known to one skilled in the art as can be seen in the mentioned Patents; however, the prior art does not disclose a light transmitting photochromic lens comprises photochromic dyes and a multilayer thin film coating on an outer surface of the lens wherein the film reflects an amount less than about 15% of spectral ultraviolet radiation in a rang between 315 and 400 nm and reflects an amount equal to or greater than about 10% of light in the visible spectrum in a range between 410 and 800 nm so that the lens exhibits the visible colored appearance as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
